

Amazon Shopping App Release Notes, Version 12.3.0

Product	Amazon Shopping App
Version	12.3.0
Release date	May 21, 2026
Supported platforms	iOS 12.0 or later, Android 12.0 or later
Document version	1.0
Status	Released

Overview

This document describes new features, improvements, and resolved issues of version 12.3.0 of the Amazon Shopping app. This release introduces the **Buy Again** feature.

New feature “Buy Again”

- **Buy Again** is a new feature available in the Account section.
- Buy Again is accessible from **Account > Buy Again**.
- The list displays all previously ordered items, sorted by most recent order date.
- Users can add any item directly to the cart from the **Buy Again** list with one tap.
- Reorders are processed through the standard checkout flow.

Improvements

- The Account section has been reorganized for faster access to frequently used features.
- Product listing pages load 15 percent faster on Android 12 devices.
- Accessibility labels have been updated for all new UI elements to support screen readers.

Resolved issues

There are no resolved issues in this release.

Known issues

On some iOS 12.0 devices, the **Buy Again** list may take up to 15 seconds to load during the first launch after installation, depending on your total history of previous orders. Subsequent loads are not affected.

 Note: To work around the slow first load, close the app completely and reopen it.

Support and feedback

For help or to report an issue, use one of the following resources:

- Amazon Help Center: [Amazon.in/Help](https://www.amazon.in/Help)
- In-app feedback: **Settings > Help > Send Feedback**
